Professional Summary
Motivated Computer Science senior seeking an entry-level software engineering or machine learning internship. Solid theoretical foundation in algorithms, data structures, and object-oriented programming with project experience in Python, HTML/CSS, and foundational machine learning.

Technical Skills
? Languages: Python, Java, C++, HTML, CSS, JavaScript (Basics)
? Frameworks & Tools: Flask, Pandas, NumPy, Git, VS Code, SQLite
? Core Competencies: Problem Solving, Data Structures, Algorithms, Teamwork

Work Experience & Internships
Software Engineering Intern | Boston Web Solutions (Summer 2025)
? Assisted in building internal admin pages using Flask, HTML/CSS, and SQLite.
? Wrote unit tests and documented REST endpoints for student management tools.
? Participated in weekly agile standups and code reviews.

Academic Projects
? Sentiment Analyzer: Course capstone project analyzing movie reviews using Python, NLTK, and Naive Bayes classifier with 79% accuracy.
? Campus Event Finder: Simple web app built using Flask, SQLite, and Bootstrap to list upcoming university events.

Education
Bachelor of Science in Computer Science (Expected Graduation: May 2026)
Boston University | GPA: 3.7 / 4.0
Coursework: Data Structures, Operating Systems, Machine Learning Foundations, Web Development
