Location: Chicago, IL

Professional Summary
Data Scientist with 4+ years of experience specializing in statistical modeling, predictive machine learning, and data visualization. Proficient in building automated Scikit-Learn pipelines, exploratory data analysis, and translating complex data into actionable executive insights.

Technical Skills
? Data Science & ML: Python, Scikit-Learn, Pandas, NumPy, XGBoost, Statistical Modeling, Feature Engineering, Matplotlib, Seaborn
? NLP & AI (Familiar): PyTorch, NLP, Transformers, spaCy, Prompt Engineering
? Databases & Cloud: SQL, PostgreSQL, BigQuery, Snowflake, AWS, Docker
? Tools & Engineering: Git, Jupyter, Airflow, Pytest

Work Experience
Data Scientist | Horizon Health Analytics (2022 - Present)
? Built predictive patient risk models using Scikit-Learn, XGBoost, and Python, improving early risk detection accuracy by 28%.
? Processed multi-terabyte healthcare datasets using SQL, Pandas, and PostgreSQL with automated feature engineering pipelines.
? Conducted clinical text exploration and sentiment analysis using spaCy and introductory transformer embeddings.
? Created executive Tableau and Streamlit dashboards for operational hospital forecasting.

Associate Data Analyst | Midwest Financial Insights (2020 - 2022)
? Extracted and transformed customer transaction data using SQL and Python.
? Built customer churn classification models using Logistic Regression and Random Forests with 84% ROC-AUC.

Key Projects
? Customer Churn Early Warning System: Predictive pipeline with automated model evaluation and FastAPI alert endpoints.
? Clinical Note Classifier: Baseline NLP classification tool comparing TF-IDF with fine-tuned BioBERT embeddings.

Education
Master of Science in Statistics & Data Science
University of Chicago | 2018 - 2020
Bachelor of Science in Mathematics
University of Illinois Urbana-Champaign | 2014 - 2018
